Amount-of-substance concentration	0.005000 mol/l

The concentration of this solution was determined with potassium permanganate solution (manufacture by article number 1.09930) standardized against volumetric standard di-sodium oxalate (article number 1.02407). The determined titer at 20°C was 1.000 with an expanded measurement uncertainty of ± 0.004 ($k=2$ coverage factor for 95% coverage probability). The certified value is traceable to primary standard NIST SRM 8040 (NIST: National Institute of Standards and Technology, USA) by means of volumetric standard di-sodium oxalate measured in the accredited calibration laboratory of Merck KGaA, Darmstadt, Germany in accordance to DIN EN ISO/IEC 17025.
